Retrofit Solutions That Fit Your Business

LEFEVER BUILDING SYSTEMS

Lefever Building Systems (LBS) offers exceptional customer service, outstanding workmanship and on time/on budget design and construction management for commercial and industrial retrofit projects. The LBS team is proud to deliver an outstanding total building experience for our customers. Our business is built on referrals and long-term partners.

RETROFIT ROOF SYSTEMS

Retrofit roofing with a metal roofing system has a much longer life cycle and lower maintenance cost than conventional roofing and this longer life cycle will allow a metal roof, installed over an existing roof, to save you approximately 40% over the roofs lifetime compared to a new conventional roof installation.

Metal re-roofing over existing roofs enhance property values, provide positive drainage, lower maintenance cost, increase thermal efficiencies with added insulation. All without costly tear-offs or interruptions to your business.

LBS OFFERS PROVEN EXPERTISE IN CONSTRUCTION MANAGEMENT

BUILDING UPGRADES
RE-ROOFING SOLUTIONS

ADDITIONS & EXPANSIONS
REPAIRS

Let our expert sales and project management team help you plan, design and build the exact retrofit project you want. Lefever Building Systems can design to meet a variety of needs from steep-pitched, complex geometric

issues, to low-slope conversions. Our goal for each project is to help the client realize significant long-term savings with increased energy efficiency, reduced cost for maintenance, and insurance.

With current inventory of existing structures, building owners are looking for a way to stop their leaky roof, enhance their energy efficiency, or improve the curb appeal of their business. Lefever Building Systems offers solutions to enhance your building in a package that fits a budget.

GET A NEW BUILDING WITHOUT BUYING A NEW ONE

- Wall Retrofits - Increase curb appeal with new panels or cladding.
- Roof Retrofits - Eliminate leaks and improve aesthetics with a new metal roof. Metal over metal, slope built-up and metal over conventional flat roofs.
- Insulation Upgrades - Increase efficiency and lower energy bills.
- Daylighting - Roof & Wall daylighting options available to bring in natural light into your building.
